

Welcome to the Great Indoors

Product Catalogue
Nordgröna 2023

An aerial photograph of a vast, dense forest of evergreen trees, likely spruce or fir, stretching across the entire frame. The trees are tightly packed, creating a textured, green surface. The lighting is bright, highlighting the individual branches and needles of the trees.

**We make interior design
products with organic
materials for spaces
where people can
relax, focus and work.**

Convex

Hexagon in colours Orange, Honey & Copper
Square in colours Azure & Lavender

Combine shapes, sizes and colours

Convex is made from naturally grown, hand-picked Scandinavian reindeer moss, ideal for absorbing noise from multiple directions.

It offers a wide range of creative and functional possibilities with its distinct geometric shapes and organic, fascinating surface.

Soft to the touch, the reindeer moss regulates its own humidity year-round and requires no maintenance at all - no watering, no trimming, no sunlight.

Little cubes for big ideas

Pixel is made from naturally grown, hand picked Scandinavian reindeer moss which reduces noise very effectively.

Only 5 by 5 cm (roughly 2 inches), **Pixel** is inspiring to the creative, design oriented mind.

The material stays fluffy by regulating its own humidity year-round and does not require any maintenance - no watering, trimming or sunlight.

Canopy
In colours Moss & Apple

Absorbing sound upside down!

Canopy is made from the same functional, hand-picked Scandinavian reindeer moss as our other forest friends. Easily fitted in your standard ceiling grid, it provides highly effective sound absorption from above.

Use it to give your space a comforting framing, patterns to emphasize the layout of the room, or combine it with complementing wall coverings.

Completely maintenance free, the panel retains its color and stays soft by absorbing and releasing moisture from the air all on its own.

Canopy
In colours Moss & Natural

A true art piece

Pixel Framed is probably the easiest way to make a unique creation with reindeer moss. Simply select one of our standard designs, or create one of your own. We will assemble your artwork by hand, frame it in oak-wood, and deliver it ready-to-install.

The naturally grown reindeer moss stays soft by regulating its own humidity year-round and requires no maintenance at all – no watering, no trimming, no sunlight.

Get moss-merized!

Bring depth and dimension into your interiors with these joyful spheres of moss.

Cloudberry is a suspended sound absorber, inspired by the delicious and rare cloudberry which grows in Scandinavia.

Natural reindeer moss has ideal properties for absorbing sound and due to its round shape and hollow centre, Cloudberry provides premium sound absorbing results.

Gently floating above

Most workdays have their ups and downs – and sometimes you need to slow down and look up to find the next move.

Glade Ceiling is an excellent soundabsorber that appears to hang free from the ceiling above you.

Available in three large sizes, these circles offer new opportunities to create unique spaces, where senses are calm and minds are free throughout the workday.

A glade indoors

Glade Wall is a little like having your very own indoor forest opening.

Available in three large sizes, these sound absorbing circles can be combined in different popping colours or natural greens. Either way, you'll hear the sound of silence.

Combining tradition with modern function

Saga brings that traditional beauty into your modern interior - using one of the most eco-friendly materials around. Cork is ideal for pinning stuff onto, and helps improve room acoustics.

The material is light-weight, fire retardant and requires no maintenance.

Saga comes in seven shapes, allowing for a wide range of fascinating looks.

We combined the magical style of olden day Scandinavian buildings with modern function, and named it "Saga" - Swedish for fairy tale.

The material

Nordgröna's reindeer moss is picked by hand, across an area of about 15.000 km² (5800 mi²). No more than 20% of the amount is picked at a time, and the area is not revisited again for at least 4-5 years. After a preservation and colour treatment, the lichen is no longer alive, and will retain its shape, colour and texture.

The material

Cork is pretty much as environmentally friendly a material can get. It's natural, sustainable, renewable as well as biodegradable. It's the only tree which can regenerate after each harvest of bark, and in doing so, traps heaps of atmospheric CO₂ each time.

After each harvest, the bark is left in the forest to dry in the sun before it is brought to the factory where it is boiled and flattened. It follows an ancient tradition, using the same methods for hundreds of years.

Cork is not only marvelously eco-friendly. As a raw material it has lots of desirable qualities - its naturally moisture wicking, durable, insulating, fire-resistant, anti-microbial, odor-repelling, buoyant and beautiful. It is used for everything from floors to surfboards to spaceships!

Our story

Nordgröna was born during a rainy hiking trip in Sweden, out of the discovery that Reindeer Moss has the unique ability to absorb water and keep the inside of tents dry.

As students at the University of Lund, the founders Oscar and twin brothers Joris & Sander found a way to apply the versatile material for modern living and working spaces, and have been interested in

developing innovative new products out of natural, regrowing materials ever since. Nordgröna's first product was installed at a local coffeehouse.

Since then, customers have included BMW, Apple, Porsche, Google, IKEA, and more. In 2019 & 2020, Nordgröna was awarded the "Di Gasell", and named one of the fastest growing companies in Sweden.

Founders Sander Oudendijk, Carl-Oscar Pressfeldt and Joris Oudendijk.
